

IOSH Working Safely

FACT SHEET

Who should go on working safely?

Working safely is for people at any level, in any sector, needing a grounding in the essentials of health and safety. Everyone at work should have an understanding of why they must 'work safely' – and this course offers exactly that.

What will they get out of it?

What they need to know – and are perhaps reluctant to learn about – in a refreshingly informal way. Working safely isn't supposed to turn delegates into safety experts. It focuses on why health and safety is important, and how individuals can make a real difference to the wellbeing of themselves and others through changing their behavior.

What will their employer get out of it?

- Nationally recognized and respected certificated training for their teams
- Peace of mind offered by training that's designed and quality-controlled by the Chartered body for health and safety
- Minimum disruption to working days and shifts – the one-day program includes the assessment, so there's no need to free up further time for a test after the course
- Working safely meets the government's guidelines for introductory health and safety training and is a 100 percent match to the Health and Safety Executive's 'passport' syllabus

- Two key areas – health and safety and environmental basics – are covered in a single self-contained session

Working Safely covers:

- ✿ Introducing working safely
- ✿ Defining hazard and risk
- ✿ Identifying common hazards
- ✿ Improving safety performance
- ✿ Protecting our environment

Timetable 1-day course

End of course assessments:

1. A 10-question multiple-choice assessment paper (15 minutes)
2. Three hazard spotting exercises (15 minutes)

Certification

For delegates who attend the course and successfully complete the written and practical assessments, delegates are awarded an IOSH Working safely certificate or a credit card-sized IOSH passport card.
