

NASAP Occupational Safety & Health Advanced Diploma

FACT SHEET

Course Objectives:

This course is designed to provide the participants required skills and knowledge to prepare and implement safety and health programs (Safety and Health Plans) at their work.

Certification:

Occupational Safety and Health Advanced Diploma

Who is this course designed for?

This course is designed for professional who desires to improve their knowledge and credentials. This independent study course consists of ten assignments earning a Professional Certification as an Environmental Health & Safety Specialist (EHS) and a certificate in Environmental Health & Safety. Understanding the quagmire of OSHA, EPA, DOT and other applicable regulations can be an overwhelming task.

The Environmental Health & Safety Certification Course clarifies your responsibilities in workplace safety and environmental protection and ensures that you have both the "know how" and the resources to meet those responsibilities.

Course Prerequisites:

The program's main language of instruction is English. Thus, the standard of English required by candidates studying this program must be such that they can both understand and articulate the concepts contained in the syllabus. EIHS recommends that candidates undertaking this qualification should possess a high level of proficiency in the English language.

On addition to language requirements, there are no further prerequisites for this course.
